

SilcoTek's ISO 6 and Class 1000 Cleanroom Capabilities

SilcoTek's Cleanroom Capabilities

- Meets and exceeds ISO 6 Class 1000 cleanroom standards, featuring several HEPA filtration systems that cycle room air up to 240 times per hour.
- Services include post-coating precision rinsing, drying, helium leak check, vacuum packaging, and custom labeling.
- In-line liquid particle counter available on precision cleaning systems within the cleanroom.

Benefits of a Cleanroom

SilcoTek is committed to helping our customers achieve the highest quality products possible, which is why we have built an ISO 6 and Class 1000 cleanroom in our coating facility. Customers can trust that their parts will be handled with care without fear of pollutants, particulates, or contaminants impacting their part. SilcoTek technicians are trained to follow all protocol required by ISO 6 and Class 1000 standards in every step of our coating process. Customers can expect to receive their SilcoTek-coated parts back in approved packaging ready for excellent performance.
