Compliance Statement

Minimization of Transmission of Transmissible Spongiform Encephalopathy (TSE) and Bovine Spongiform Encephalopathy (BSE)

SilcoTek does not use materials of animal origin in SilcoTek processes. In addition, SilcoTek coating services are all at temperatures above 250 degrees Celsius, which further reduces risk of any TSE or BSE contaminations. SilcoTek packaging of customer parts is able to be specified to further avoid any risk.

Latex

SilcoTek does not use latex materials. Gloves used by employees are nitrile-based. SilcoTek standard packaging of customer parts does not use latex.

Best Regards,

A handwritten signature in black ink, appearing to read "G. White".
